

THE FEMININE FACE OF LEADERSHIP IN SCIENCE™

COLLABORATIVE STUDY & SEMINAR – CALL FOR PARTICIPATION

Women bring a competitive advantage to science. Science needs more women leaders.

What would empower you to lead with greater impact without sacrificing your wellbeing?

THE FEMININE FACE OF LEADERSHIP IN SCIENCE (FFLS) is a collaborative study that engages women scientists into an enlivening conversation and interactive experience, unlike any you've had before.

THIS COLLABORATIVE STUDY IS NEW...

- It catalyzes a *deeper exploration* among colleagues across scientific disciplines. Discover more about your experience, needs, and aspirations for growing as leaders in science.
- It is designed for rich *participant inquiry, group interaction and mutual support*. Leverage what's meaningful to you.
- In the FFLS Forum we will explore important issues with *candor, curiosity, and safety*.

Who is the leader you need to become so you make the contributions that matter most?

What qualities of leadership are essential for better addressing the complex issues you face?

What must happen so you can thrive in science?

FFLS STRUCTURE & DATES

Phase 1 – October 3-28, 2016

(Engage from anywhere)

THIS STUDY IS FOR YOU IF...

- You want to embody a healthier, more authentic and co-creative way of leading.
- Your professional education (Masters or PhD level) and current professional activity are in the natural sciences, e.g. bio-science, chemistry, physics, etc.
- You currently work in a position of leadership or senior management in your organization.

“Looking at leadership together and asking the tough questions was so inspiring. It gave me greater clarity for my path.” – FFLS Participant
